

Half of the shells is the same as  $\frac{2}{4}$  of the shells.

**True or False?**

I think it is  
true because  
 $\frac{1}{2} = \frac{2}{4}$

I think it is false  
because half is  
two and quarter  
is four.

I think it is true because  
 $\frac{1}{2}$  would be 8 shells.  
 $\frac{1}{4}$  would be 4 shells so  
two quarters would be  
 $4 + 4 = 8$ .
